

Labelase® Laser Printers

Industrial Metal Tag and Label Printers

Printers as Tough as the Tags They Print

InfoSight makes rugged printers and tough metal tags. As a system they deliver the efficiencies of bar coding and the safety of product traceability, especially for heavy industry, product manufacturing and facilities with extreme production conditions.

Labelase® printers routinely exceed one million print cycles, and our free *Producer™* software makes them easy to use. Features include continuous printing, easy tag design and straightforward systems integration.

Labelase printers are welcome in offices and on manufacturing shop floors, because they are compact, quiet and easy to maintain. They also eliminate ribbons, inks and other consumables.

InfoSight printers provide:

- ◆ Speed, clarity and unsurpassed flexibility.
- ◆ Print on-command or by network control.
- ◆ PC-compatible fonts, bar codes, logos.
- ◆ Worldwide 24/7 live technical assistance.
- ◆ Industry leading efficiency and value.
