Do I need to Barcode?

What is the difference between Assets and Inventory?
How can barcodes error-proof?
What is Cradle to Grave Tracking?

Barcoding Basics

1D or 2D?
What makes a good barcode?
Are some barcodes better than others?

What's New?

Barcode Survival Environments:
High temperature, chemicals, acids, cleaning solutions, UV protection.

Why should I Barcode?

Benefits to barcoding:
Auto-ID
Tracking

Why I can't barcode?

Paper burns.
Plastic melts.
Printers are for offices.

Barcodes can now survive your process.

This paper will show you how.
