

Industrial Asset Tags

Asset Identification to Last the Lifetime of the Asset

ToughTag™
Rugged and easy to read

SSL Tag™
Black print on stainless steel

PermaLabel®
Abrasion resistant. For rough handling.

Polyacrylic Label
Durable, adhesive tag

Conditions that destroy paper tags and plastic nameplates:

- ~ long term weathering ~ chemicals and cleaners ~ salts & organic solvents ~ vibration ~ uncommon abrasion ~ high heat and extreme cold ~ physical abuse

InfoSight tags cut costs, increase safety and ensure traceability.

Start to Finish Traceability

ToughTag™ - a favorite of maintenance teams at chemical plants, power plants and other heavy industrial facilities. Positive identification for greater safety, lock-out/tag-out, shutdowns and startups. Rust proof. Won't burn or fade in the sun.

SSL™ - an InfoSight innovation, SSL is the easy way to print text, bar codes and images that keeps the clean look and durability of a real stainless steel tag. Just as tough as ToughTag, SSL adds a finished look to InfoSight's lifetime tags.

PermaLabel® survives the scraping and rough handling that industrial products endure in everyday use. You'll find them in production lines, repair depots, marine shipping, even on the International Space Station.
Department of Defense UID approved

Polyacrylic Labels proven in war zones around the world, these are military grade low profile self-adhesive labels. Compliant with U.S. Military, Government and international identification standards for data matrix coding and lifetime identification.
DOD and FDA approved.

Extraordinary Toughness ✦ Exceptional Readability
